# TECHNOLOGY PHILOSOPHY

The Conejo Valley Unified School District strives to support all learners to be college and career ready. The responsible use of technology will empower students to maximize their full potential, as well as prepare them for their future. Technology shall be seamlessly integrated throughout the instructional program.

The Conejo Valley Unified School District shall provide access to a wide range of technological resources for staff and student use. Access to technology means that the teachers and students can utilize technology to collaborate, communicate, create, and support critical thinking whenever necessary. The District shall provide professional learning opportunities for teachers and staff.

The Conejo Valley Unified School District shall support technology through planned and measured means, including the establishment and maintenance of goals incorporated into the Local Control Accountability Plan supported by a thoughtful budget to ensure long term sustainability. This includes utilizing technology to provide communication and targeted outreach that informs the community of programs and opportunities that support positive student outcomes. The district shall maintain the bandwidth to support the school community.

The Conejo Valley Unified School District shall implement a process to evaluate pedagogy to ensure teachers and students could introduce new resources to keep pace with an ever-changing technology environment. The district shall work within its means to implement and support new resources within budgetary and staffing constraints.

# CVUSD TECHNOLOGY COMMITTEE

The goal of the CVUSD Technology Committee is to promote the strategic and efficient use of technology, both hardware and software, to support student learning. The CVUSD Technology Committee is charged with creating the strategic technology plan and curriculum for the District. Our mission is to promote the use of technology, to increase operations efficiency while supporting instructional services and student learning.

The responsibilities of the Committee include:

- Working with Technology Services to ensure secure computer and internet access to all students while systematically supporting, upgrading, or replacing technology solutions to meet District needs.
- Supporting the success of students through the development of instructional technologies
- Coordinate and assist with technology strategic planning efforts across the District
- Review services provided by Technology Services and make recommendations for adding, changing and removing solutions
- Review and make recommendations on new and revised policies across technology services for the District.

The Technology Committee, made up of a cross section of faculty, staff and students, meets to discuss and evaluate all matters related to technology at the Conejo Valley Unified School District.
